Andrew C. Gallagher

METHOD FOR COMPENSATING A
DIGITAL IMAGE FOR LIGHT
FALLOFF WHILE MINIMIZING
LIGHT BALANCE CHANGE

Patent No. 6,940,546 *B2*

Issued 09-06-2005

Commissioner for Patents
P.O. Box 1450
Alexandria, VA. 22313-1450

Sir:

Assignee: Eastman Kodak Company

I hereby certify that this correspondence is being deposited today with the United States Postal Service as first class mail in an envelope addressed to Commissioner For Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE
CERTIFICATE OF CORRECTION

PATENT NO.: 6,940,546 *B2*

DATED: 09-06-2005

INVENTOR(S): Andrew C. Gallagher

It is certified that an error appears in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

Column 9, Claim 6, Line 55, after "6." delete "The method as claimed in claim 1" and insert

--An image processing method for compensating for light falloff in a digital image, said method comprising the steps of:

providing an input digital image comprised of image pixels;
providing individual compensation values to correct light falloff in one or more of the image pixels, whereby the individual compensation values induce a balance change in the digital image;

determining a balance value for correcting the balance change of the digital image; and

applying the individual compensation values and the balance value to said one or more pixels of the input digital image to provide a corrected image having compensation for light falloff with minimal change to the light balance; --

Column 10, Claim 10, Line 16, after "10." Delete "A method as claimed in claim 7" and insert

--An image processing method for compensating for light falloff in a digital image, said method comprising the steps of:

providing a digital image comprised of image pixels;
providing falloff compensation information which varies depending on location within the digital image;

using the falloff compensation information to generate an individual compensation value for one or more of the image pixels;

determining a balance value from the falloff compensation information; and

applying the individual compensation value and the balance value to said one or more pixels of the digital image to provide a corrected image having compensation for light falloff with minimal change to the light balance; --
